Toxicology 138 (1999) 185–187

TOXICOLOGY

Subject index of volume 133

Acetaminophen; Tumor necrosis factor-α; Liver injury; Kupffer cells; Hepatocytes **133**, 85

Acrolein; Toxicity in vitro; Glutathione; Rat lung slices; Phase II metabolism; Pneumocytes II **133**, 129

Aflatoxin B_1; Macrophages; Cytotoxicity; Reactive oxygen intermediate; Reactive nitrogen intermediate; Cytokine **133**, 171

Amiodarone; Lung; Fibrosis; Pulmonary toxicity; Vitamin E; Dietary supplementation **133**, 75

Antiestrogenic; Polycyclic aromatic hydrocarbons; Endocrine-disruptors; MCF-7 cells; Estrogen receptor **133**, 115

Apoptosis; Cadmium; Lung epithelial cell; Oxidative stress response; Gene expression; Glutathione; Glutathione S-transferase; γ-Glutamylcysteine synthetase; Redox sensitive transcription factors **133**, 43

Bone density; Cadmium; Metallothionein; Chronic exposure; Caloric restriction; Nephrotoxicity; Osteotoxicity **133**, 93

Cadmium; Lung epithelial cell; Apoptosis; Oxidative stress response; Gene expression; Glutathione; Glutathione S-transferase; γ-Glutamylcysteine synthetase; Redox sensitive transcription factors **133**, 43

Cadmium; Metallothionein; Chronic exposure; Caloric restriction; Bone density; Nephrotoxicity; Osteotoxicity **133**, 93

Calcium; Zinc; Transport; Red blood cells; Inhibition; Membrane **133**, 139

Caloric restriction; Cadmium; Metallothionein; Chronic exposure; Bone density; Nephrotoxicity; Osteotoxicity **133**, 93

Chronic exposure; Cadmium; Metallothionein; Caloric restriction; Bone density; Nephrotoxicity; Osteotoxicity **133**, 93

Coumarin 7-hydroxylase; CYP2A6; Molecular modelling; Substrate selectivity **133**, 1

CYP2A6; Coumarin 7-hydroxylase; Molecular modelling; Substrate selectivity **133**, 1

Cytokine; Aflatoxin B_1; Macrophages; Cytotoxicity; Reactive oxygen intermediate; Reactive nitrogen intermediate **133**, 171

Cytotoxicity; Aflatoxin B_1; Macrophages; Reactive oxygen intermediate; Reactive nitrogen intermediate; Cytokine **133**, 171

Dietary supplementation; Amiodarone; Lung; Fibrosis; Pulmonary toxicity; Vitamin E **133**, 75

Endocrine-disruptors; Polycyclic aromatic hydrocarbons; Antiestrogenic; MCF-7 cells; Estrogen receptor **133**, 115

Endothelial cell; Fibroblast growth factor; Heparan sulfate; Glycosaminoglycan; Proteoglycan; Lead **133**, 147

Endothelial cell; Fibroblast growth factor; Heparan sulfate; Perlecan; Proteoglycan; Lead **133**, 159

Environmental contaminant; Extrapolation; Immunotoxicity; Intra-species variability; Risk assessment **133**, 59

Epstein–Barr virus; Smokeless tobacco; Virus induction; 12-*O*-tetradecanoyl phorbol-13-acetate; *n*-Butyrate; Fluorescence-activated cell sorter flow cytometry **133**, 35

Estrogen receptor; Polycyclic aromatic hydrocarbons; Endocrine-disruptors; Antiestrogenic; MCF-7 cells **133**, 115

Extrapolation; Environmental contaminant; Immunotoxicity; Intra-species variability; Risk assessment **133**, 59

Fibroblast growth factor; Endothelial cell; Heparan sulfate; Glycosaminoglycan; Proteoglycan; Lead **133**, 147

Fibroblast growth factor; Endothelial cell; Heparan sulfate; Perlecan; Proteoglycan; Lead **133**, 159

Fibrosis; Amiodarone; Lung; Pulmonary toxicity; Vitamin E; Dietary supplementation **133**, 75

PII: S0300-483X(99)00046-3

Fluorescence-activated cell sorter flow cytometry; Smokeless tobacco; Epstein–Barr virus; Virus induction; 12-*O*-*t*etradecanoyl phorbol-13-acetate; *n*-Butyrate **133**, 35

Gene expression; Cadmium; Lung epithelial cell; Apoptosis; Oxidative stress response; Glutathione; Glutathione S-transferase; γ-Glutamylcysteine synthetase; Redox sensitive transcription factors **133**, 43

γ-Glutamylcysteine synthetase; Cadmium; Lung epithelial cell; Apoptosis; Oxidative stress response; Gene expression; Glutathione; Glutathione S-transferase; Redox sensitive transcription factors **133**, 43

Glutathione; Acrolein; Toxicity in vitro; Rat lung slices; Phase II metabolism; Pneumocytes II **133**, 129

Glutathione; Cadmium; Lung epithelial cell; Apoptosis; Oxidative stress response; Gene expression; Glutathione S-transferase; γ-Glutamylcysteine synthetase; Redox sensitive transcription factors **133**, 43

Glutathione S-transferase; Cadmium; Lung epithelial cell; Apoptosis; Oxidative stress response; Gene expression; Glutathione; γ-Glutamylcysteine synthetase; Redox sensitive transcription factors **133**, 43

Glycosaminoglycan; Endothelial cell; Fibroblast growth factor; Heparan sulfate; Proteoglycan; Lead **133**, 147

Heparan sulfate; Endothelial cell; Fibroblast growth factor; Glycosaminoglycan; Proteoglycan; Lead **133**, 147

Heparan sulfate; Endothelial cell; Fibroblast growth factor; Perlecan; Proteoglycan; Lead **133**, 159

Hepatocytes; Acetaminophen; Tumor necrosis factor-α; Liver injury; Kupffer cells **133**, 85

Immunotoxicity; Environmental contaminant; Extrapolation; Intra-species variability; Risk assessment **133**, 59

Inhibition; Zinc; Calcium; Transport; Red blood cells; Membrane **133**, 139

Intra-species variability; Environmental contaminant; Extrapolation; Immunotoxicity; Risk assessment **133**, 59

Kupffer cells; Acetaminophen; Tumor necrosis factor-α; Liver injury; Hepatocytes **133**, 85

Lead; Endothelial cell; Fibroblast growth factor; Heparan sulfate; Glycosaminoglycan; Proteoglycan **133**, 147

Lead; Endothelial cell; Fibroblast growth factor; Heparan sulfate; Perlecan; Proteoglycan **133**, 159

Lead; Thiamine; Transketolase; Rat brain; Seizure threshold **133**, 105

Liver injury; Acetaminophen; Tumor necrosis factor-α; Kupffer cells; Hepatocytes **133**, 85

Lung; Amiodarone; Fibrosis; Pulmonary toxicity; Vitamin E; Dietary supplementation **133**, 75

Lung epithelial cell; Cadmium; Apoptosis; Oxidative stress response; Gene expression; Glutathione; Glutathione S-transferase; γ-Glutamylcysteine synthetase; Redox sensitive transcription factors **133**, 43

Macrophages; Aflatoxin B_1; Cytotoxicity; Reactive oxygen intermediate; Reactive nitrogen intermediate; Cytokine **133**, 171

MCF-7 cells; Polycyclic aromatic hydrocarbons; Endocrine-disruptors; Antiestrogenic; Estrogen receptor **133**, 115

Membrane; Zinc; Calcium; Transport; Red blood cells; Inhibition **133**, 139

Metallothionein; Cadmium; Chronic exposure; Caloric restriction; Bone density; Nephrotoxicity; Osteotoxicity **133**, 93

Molecular modelling; Coumarin 7-hydroxylase; CYP2A6; Substrate selectivity **133**, 1

***n*-Butyrate**; Smokeless tobacco; Epstein–Barr virus; Virus induction; 12-*O*-*t*etradecanoyl phorbol-13-acetate; Fluorescence-activated cell sorter flow cytometry **133**, 35

Nephrotoxicity; Cadmium; Metallothionein; Chronic exposure; Caloric restriction; Bone density; Osteotoxicity **133**, 93

Osteotoxicity; Cadmium; Metallothionein; Chronic exposure; Caloric restriction; Bone density; Nephrotoxicity **133**, 93

12-*O*-*t*etradecanoyl phorbol-13-acetate; Smokeless tobacco; Epstein–Barr virus; Virus induction; *n*-Butyrate; Fluorescence-activated cell sorter flow cytometry **133**, 35

Oxidative stress response; Cadmium; Lung epithelial cell; Apoptosis; Gene expression; Glutathione; Glutathione S-transferase; γ-Glutamylcysteine synthetase; Redox sensitive transcription factors **133**, 43

Perlecan; Endothelial cell; Fibroblast growth factor; Heparan sulfate; Proteoglycan; Lead **133**, 159

Phase II metabolism; Acrolein; Toxicity in vitro; Glutathione; Rat lung slices; Pneumocytes II **133**, 129

Pneumocytes II; Acrolein; Toxicity in vitro; Glutathione; Rat lung slices; Phase II metabolism **133**, 129

Polycyclic aromatic hydrocarbons; Endocrine-disruptors; Antiestrogenic; MCF-7 cells; Estrogen receptor **133**, 115

Proteoglycan; Endothelial cell; Fibroblast growth factor; Heparan sulfate; Glycosaminoglycan; Lead **133**, 147

Proteoglycan; Endothelial cell; Fibroblast growth factor; Heparan sulfate; Perlecan; Lead **133**, 159

Pulmonary toxicity; Amiodarone; Lung; Fibrosis; Vitamin E; Dietary supplementation **133**, 75

Rat brain; Lead; Thiamine; Transketolase; Seizure threshold **133**, 105

Rat lung slices; Acrolein; Toxicity in vitro; Glutathione; Phase II metabolism; Pneumocytes II **133**, 129

Reactive nitrogen intermediate; Aflatoxin B_1; Macrophages; Cytotoxicity; Reactive oxygen intermediate; Cytokine **133**, 171

Red blood cells; Zinc; Calcium; Transport; Inhibition; Membrane **133**, 139

Redox sensitive transcription factors; Cadmium; Lung epithelial cell; Apoptosis; Oxidative stress response; Gene expression; Glutathione; Glutathione S-transferase; γ-Glutamylcysteine synthetase **133**, 43

Risk assessment; Environmental contaminant; Extrapolation; Immunotoxicity; Intra-species variability **133**, 59

Seizure threshold; Lead; Thiamine; Transketolase; Rat brain **133**, 105

Smokeless tobacco; Epstein–Barr virus; Virus induction; 12-*O*-tetradecanoyl phorbol-13-acetate; *n*-Butyrate; Fluorescence-activated cell sorter flow cytometry **133**, 35

Substrate selectivity; Coumarin 7-hydroxylase; CYP2A6; Molecular modelling **133**, 1

Thiamine; Lead; Transketolase; Rat brain; Seizure threshold **133**, 105

Toxicity in vitro; Acrolein; Glutathione; Rat lung slices; Phase II metabolism; Pneumocytes II **133**, 129

Transketolase; Lead; Thiamine; Rat brain; Seizure threshold **133**, 105

Transport; Zinc; Calcium; Red blood cells; Inhibition; Membrane **133**, 139

Tumor necrosis factor-α; Acetaminophen; Liver injury; Kupffer cells; Hepatocytes **133**, 85

Virus induction; Smokeless tobacco; Epstein–Barr virus; 12-*O*-tetradecanoyl phorbol-13-acetate; *n*-Butyrate; Fluorescence-activated cell sorter flow cytometry **133**, 35

Vitamin E; Amiodarone; Lung; Fibrosis; Pulmonary toxicity; Dietary supplementation **133**, 75

Zinc; Calcium; Transport; Red blood cells; Inhibition; Membrane **133**, 139
